Client Docket No.: E1-7595

AMENDMENTS TO THE SPECIFICATION

Please replace the title with the following:

Lubricant and Additive Compositions and Methods Comprising Dispersants and a Detergent

Please replace the paragraph beginning at page 5, line 13 with the following paragraph:

In some embodiments, the boron-containing dispersant may comprise, for example, a boronated polyisobutylene succinimide or bis-succinimide or a mixture thereof. The polyisobutylene may have a <u>weight average</u> molecular weight from about 210 to about 1300 amu, as a further example from about 900 to 1300-amu, and as an even further example from about 1200 to about 1300-amu.
